Kerala, India

Senior Backend Engineer with 4+ years of experience building scalable B2B SaaS platforms

EXPERIENCE

Senior Backend Engineer (SE-3)

Sep 2024 - Apr 2026

Detect Technologies

Chennai, India

- **Performance Optimization:** Improved API response times by **99% (reduced SQL queries from 4,081 to 9)** using Django-Silk, prefetch_related, and indexing; utilized RDS Read Replicas and Proxy to enable horizontal scalability.
- **NRL Scope Management:** Architected cloud-agnostic PostgreSQL schema and asynchronous data pipelines using Python/Django, Redis, and Dramatiq; **reduced memory usage by 70%** and eliminated 504 timeouts.
- **T-Pulse v23 Release:** Led a 4-engineer team to deliver major feature enhancements and **resolve 200+ issues**; achieved 100% green VAPT status, unblocking revenue for high-value clients like BPCL.
- **CI/CD:** Improved **system stability by 90%** by re-architecting T-Pulse CI/CD pipelines (IaC) using Python, Terraform, AWS, and GitLab CI/CD for Fortune 500 clients (Shell, ExxonMobil, Adani, Reliance, etc).
- **Engineering Leadership:** Managed a 3-engineer team, conducting 1:1s and mentorship resulting in a direct report promotion from SE-1 to SE-2.
- **Tech Stack:** Python, Django, Redis, Celery, PostgreSQL, Docker, Kubernetes, Terraform, GitLab CI/CD, AWS

Backend Engineer

May 2022 - Sep 2022

Certa

India (Remote)

- Designed multi-tenant REST APIs for a Workflow Engine platform serving clients like Walmart and Uber, maintaining less than **200 ms latency**.
- Eliminated N+1 queries and sequential scans using Django-Silk, prefetch_related, and indexing; achieving a **99% improvement** in API response times.
- Reduced production timeouts and exceptions by **35%** by fixing race conditions and optimizing resource utilization monitored via Datadog and Sentry.
- **Tech Stack:** Python, Django, pytest, Redis, Celery, PostgreSQL, AWS

Software Engineer

Dec 2020 - May 2022

Swym

India (Remote)

- Architected a Revenue Analytics Platform from scratch using **Clojure and PostgreSQL** for real-time subscription tracking.
- Built an automated Clojure-based ETL pipeline processing **300K+ events** for **100K+ Shopify merchants**; automated reporting workflows using Metabase, saving **60+ engineering hours per month**.
- Redesigned annual billing flow via Shopify GraphQL Billing APIs, **automating 95%** of subscription renewals, eliminating manual processing, and reducing churn.
- **Tech Stack:** Clojure (Functional Programming), Redis, Citus (Distributed PostgreSQL), AWS

Software Engineering Intern

Feb 2020 - Jun 2020

PubNinja

Bengaluru, India

- Achieved a **95% reduction** in page rendering time (**300ms to 5ms**) by optimizing server-side template rendering, eliminating Cloudflare timeout errors.
- Developed a **Node.js** comments service supporting 3+ content types, **reducing code redundancy by 60%**; engineered a real-time notification engine via Twilio.
- **Tech Stack:** Node.js, Express.js, Redis, MySQL, AWS

Software Engineering Intern

Fyle

Apr 2019 - Oct 2019

Bengaluru, India

- Optimized PDF Exports Microservice, developing deduplication mechanism that eliminated **8,000+ redundant daily API calls**.
- Improved PostgreSQL query performance by **70% (10s to 3s)** through execution plan analysis and index tuning.
- Co-authored a technical blog post on [JDBI and Timezones](#), ranked as the platform's **second most popular article**.
- **Tech Stack:** Python, Flask, Java, Dropwizard, PostgreSQL, RabbitMQ, Docker, Kubernetes, AWS

PROJECTS

CoWIN Slack Bot

- **Serverless Vaccine Notifier:** Engineered a Python-based Slack bot on AWS Lambda to poll CoWIN REST APIs; enabled **30+ successful vaccine bookings** through real-time automated availability alerts.
- **Tech Stack:** Python, Redis, Slack API, AWS Lambda

SKILLS

Proficient: Python, Django, Flask, PostgreSQL, AWS, Docker, Redis, Celery, Git

Familiar: C++, Java, JavaScript, Node.js, Express.js, Clojure, HTML, CSS, React.js, Next.js, MySQL, MongoDB, Kubernetes, GCP

Others: REST API Design, Microservices Architecture, System Design, Performance Optimization, CI/CD

EDUCATION

Chitkara University

Aug 2016 - Jul 2020

Bachelor of Engineering in Computer Science and Engineering | **CGPA: 8.76/10**

Punjab, India

- Selected for University Coding Academy (**Top 10%**); Core Team Member at Google Developer Student Clubs.

ACHIEVEMENTS

- **ICPC Asia Kolkata-Kanpur Regionals 2018:** Qualified for the [Onsite Regionals \(2018\)](#), competing against top programming teams in one of the world's most prestigious algorithmic contests.
- **Certifications:** [Udacity Full Stack Web Developer Nanodegree](#); [CodeChef DSA Foundation Certification](#).
